PROFILE SUMMARY

Data professional with 8+ years in business intelligence, ETL and enterprise analytics. Designed SQL Server warehouses integrating Oracle ERP and processing 10M+ rows daily across 400+ distributors and 1M+ customers. Built governed self-service BI and analytics supporting marketing ROI and distribution decisions. Kaggle Competition Expert, Silver and Bronze Medalist, CUHK-X Top 15 Finalist and Inter-Uni Datathon finalist. Completing a Monash Master of Data Science (Research), expected December 2026.

CORE SKILLS

Commercial analytics: Sales and account performance; repeat orders; product penetration; marketing effectiveness; distributor scoring; price, volume and mix analysis; KPI reporting

SQL and data: Microsoft SQL Server, SSMS, SSIS and SSRS; data warehousing; ETL; data validation; Python, Pandas and NumPy; PyTorch, LightGBM, scikit-learn, Docker and Git

Dashboards and digital analytics: Tableau; Power BI; Google Analytics for SEO and marketing; self-service reporting; Tableau Desktop Specialist

Business partnership: Requirements gathering; prioritising analytics requests; communicating findings to non-technical teams; training and cross-functional leadership

PROFESSIONAL EXPERIENCE

PT Nutrifood Indonesia **Jakarta, Indonesia**

Data & Management Information System Team Lead *Oct 2023 - Jan 2025*

- Led two teams totalling 10 people, working with business leaders to define reporting needs, prioritise analysis and translate findings into practical recommendations.
- Led self-service analytics across multiple divisions, enabling business users to build dashboards and access governed data with less reliance on central reporting.
- Developed training and a gamified data-literacy programme to help non-technical colleagues use analytics tools and interpret business metrics.

Business Intelligence Developer and Analyst *Jul 2018 - Sep 2023*

- Designed and built SQL Server data warehouses from scratch, integrating Oracle ERP, sales, marketing and research-app data through SSIS ETL pipelines.
- Processed 10M+ rows daily across 400+ distributors and 1M+ customers, maintaining data quality and reporting over 100M+ historical rows.
- Designed performance scoring for 400+ distributors using assortment, YTD and YoY growth, marketing cost ratios and product returns; streamlined evaluation and saved more than 30 working days annually.
- Analysed product penetration, repeat orders and account performance to identify adoption gaps and regional growth opportunities for commercial teams.
- Supported marketing ROI and distribution-channel decisions by analysing TV/non-TV advertising and BTL promotions, including buy-one-get-one offers, in SQL Server and Tableau.
- Built governed self-service BI through the QlikView-to-Tableau transition: security, user management, versioning and version history, data governance, master data management and schema design. Led Tableau environment setup and migrated 100+ reports.

PROFESSIONAL EXPERIENCE CONTINUED

PT Emerio Indonesia (NTT) **Greater Jakarta, Indonesia**

IT Banking Intern - Junior Consultant *Mar 2017 - Jul 2018*

- Worked with business analysts to build ETL pipelines and data-warehouse structures for 30+ banking reports, including source validation and data-quality checks.
- Supported REGLA reporting implementations for Bank Sinarmas and MUFG; developed a hospital BI dashboard proof of concept covering bed capacity, appointments and emergency-room availability.

SELECTED PROJECTS

Calligrafia **SEO and marketing analytics**

- Used Google Analytics for SEO and marketing analysis.

Hybrid Recommendation System **Monash University | 2026**

- Built an end-to-end Python pipeline combining SVD, KNN and LightGBM, with feature engineering and systematic model comparison.
- Evaluated approximately 745,000 interactions using validation designed to prevent data leakage; achieved held-out RMSE of 0.723 against 0.887 for the SVD benchmark.

ROGII Wellbore Geology Prediction **Kaggle | 2026**

- Earned a Silver Medal, placing 158th of 6,191 teams with private leaderboard RMSE of 7.989.
- Combined physics-informed particle filters, gradient boosting and full-well neural models; validated by grouping folds by well to prevent leakage.

Pokémon TCG AI Battle Challenge **Kaggle | 2026**

- Earned a Bronze Medal and Kaggle Competition Expert status; developed a PyTorch Transformer policy-value agent using human-replay imitation learning and controlled evaluation.

Inter-Uni Datathon 2026 | Team Lord Momo

• Highest-ranked eligible team on the Stream 3 Kaggle leaderboard; advanced to the presentation stage and finished as finalists. Worked on gas sensor drift classification with EDA, feature engineering and validation.

EDUCATION

Monash University **Melbourne, Australia**

Master of Data Science (Research) *Expected Dec 2026*

Research: bounded technical-feasibility evaluation of adaptive messaging using synthetic data and simulation.

BINUS University **Jakarta, Indonesia**

Undergraduate Degree in Information Technology *Aug 2018*

ADDITIONAL EXPERIENCE

Hotel Accor | Kitchen Steward Sep 2026 - Present

CREDENTIALS AND ADDITIONAL INFORMATION

Credentials: Tableau Desktop Specialist (Feb 2025); Databricks Fundamental (Aug 2026); IELTS Academic 7.5 (Jan 2022)

Planned certifications (not yet earned): Microsoft PL-300; Azure cloud; further Databricks certification.

Languages: English - professional fluency; Indonesian - native
